The entire class was invited to the Neil Olson home at Lake Margrethe for breakfast after the night's activities, served by Mrs. Olson and Mrs. Welch, but the membership had dwindled to around twenty-two by the small hours.

Crocodile Feeders...

"An appeaser is a person who feeds a crocodile hoping it'll eat him last." So writes Tom Anderson, a well-known observer of the American political and economic scene. He points out that too many of us have not realized that if we have socialized agriculture and socialized power, we will have socialized medicine — and a socialized America."

Every person — in business, in labor and in government — who wants his children to enjoy individual freedom and opportunity and the privilege of a meaningful vote on election day, has immediate need to oppose the pressure for the welfare state idea in the U. S. with its size, costs, and dictation by government. He may act friendly — but don't feed the crocodile. He will shed those "crocodile tears" just before he swallows you.

An Age Of Miracles...

The feature article in the May 3 issue of Time magazine deals with the miracles — the almost incredible miracles — performed by modern surgery. It is accompanied by a superb series of full-page color photographs. Some, inevitably, are on the gory side, and will disturb the squeamish. But all show innovations, discoveries, perfections of technique and apparatus, and, beyond all, human skill and knowledge that not only saves lives, but makes possible productive living that would have been impossible not long ago.

We see the repair of a diseased heart, an operation requiring nine specialists of various kinds along with a complex machine. We see the replacement of a faulty kidney, and the restoration to vigorous life of a man who had been given only eight weeks to live. We see the new and amazing freezing attack on the hitherto incurable Parkinson's disease. We see the removal of a cancerous breast, and the lymph nodes that house and harbor this killer. We see the repair of a hand deformed, seemingly beyond hope, by arthritis. And we see micro-surgery — where the surgeon, looking through a high powered microscope into the middle ear and using instruments and skills of the utmost delicacy, restores lost hearing.

These are wonders. Unknown numbers of people will benefit from them as the years wear on, and as

knowledge spreads and gains. They are not, of course, just American achievements — science, in medicine or in any other era, recognizes no national barriers. The bases on which they are built go back, in many cases, for a century or more, and many men made their contributions until, finally, a whole was achieved. But they were made possible by men and women — individual men and women — not by committees, not by governments, not by bureaucracies working from books of rules. The results speak for themselves, and need no argument — and the words they speak are the words that affirm the freedom to try, and to fail and succeed, to push on in the face of discouragement, always with a given end in view. This is the case — the irrefutable case — for free medicine.

Frederic Teacher Wins Ferris Scholarship

Elm Beery, a science teacher at Frederic Public Schools, Frederic, is one of 26 state teachers who have been awarded a scholarship from Automobile Club of Michigan to attend the 40th Driver Education Institute at Ferris College, June 10-21.

Satisfactory completion of the two-week session, featuring both classroom and behind-the-wheel instruction, will qualify teachers as driver-education instructors for state secondary schools.

The Institutes, sponsored twice each year by Auto Club, have graduated more than 2,500 driver instructors since the course was initiated in 1939. The scholarship will cover the cost of lodging, meals and classroom materials.

Chief instructor for the Institute is Howard Hale, driver education and safety instructor at Ferris. He will be assisted by members of the Auto Club's safety and traffic department, and representatives from the State Department of Public Instruction, Michigan State Police, Secretary of State office, and the Michigan State Highway Department.

This year's graduates will join 1,200 full and part-time driver-education teachers who will instruct an estimated 110,000 students during the coming school year. Last year, 103,000 students completed the course, now a licensing prerequisite in Michigan for drivers under 18 years of age. Auto Club officials state that at least 150 new teachers will be required this year to handle the increased load and serve as replacements in Michigan public schools.

Conservation Notes
As of June 7th, a total of six deer had been killed on the highway in Crawford County this month. In May, nineteen deer had been killed by the Department after being killed by cars. The Department cautions motorists traveling the new expressways that the fences alongside do not keep deer from jumping onto the roadways, so they continue to be a hazard to motorists.

Recent heavy rains lessened the fire danger for the present, but this situation can change in only a few days. The last fires handled by the local force were on May 31 and on June 1, at a cabin on the Stephan Bridge Road. Debris had been burned in a pit in back of the cabin, the persons so doing had left, and the fire had spread from the pit afterwards. Quick action

by two separate groups held the fire to three-tenths of an acre. The fire tower man, even though knowing a burning permit had been issued to the location, realized the smoke wasn't right for permit burning and called the local unit. Some of the people living in the area also realized there was trouble, and quick action on their part had the blaze partly controlled by the time the conservation unit arrived. The unit was half way there by the time a local call was placed about the fire.

Grayling Sailor In
Joint Military Exercise

USS BRISTOL (FHTNC) - Carl
W. Waite, radarman seaman, USN,
son of Mrs. Stella Waite of 308
Mikado St., Grayling, took part in
a joint United States-French mili-
tary exercise in the Mediterranean
early this month while serving a
board the destroyer USS Bristol.

The exercise was conducted May
1-10 in the Western Mediterrean
and involved elements of the
Sixth Fleet and the French Army,
Air Force, and Navy.

The exercise, dubbed "Fair
Game," was aimed at providing
mutual tactical training and fam-
iliarization in air, amphibious and
submarine operations.

Sixty ships from both countries
spread out in the western part of
the sea for the mock attack on the
island of Corsica. Aircraft carriers
submarines, cruisers, destroyers,
amphibious ships, minesweepers,
and logistic support ships provid-
ed seaward protection and deliv-
ered U. S. Marine and French
Commandos to the simulated in-
vasion beaches. They were oppo-
sed by French Army troops.

Fair Game was the latest of a
series of annual bilateral exercises
between American and French
forces in the Mediterranean.

We begin by re-examining present policies. We compare them
with more modern policies, available today. (There have been
many changes in insurance, during the last 4 years.)

Many, many times, we can consolidate your policies to advan-
tage. Often we can get you theft coverage at little added cost.

That's because we are qualified Protection Agents in this com-
